Executive Summary

The Yahara River Watershed is threatened by excessive phosphorus from sources such as agricultural runoff, urban stormwater and wastewater treatment plant discharges. The elevated phosphorus levels are a threat to water quality and aquatic life throughout the area. The Yahara Watershed Improvement Network (Yahara WINS) began in 2012 to reduce all phosphorus loads and meet water quality standards established by the Wisconsin Department of Natural Resources (WDNR). This program employs watershed adaptive management, a strategy in which all sources of phosphorus pollution in an area work together to meet water quality goals. This strategy is more effective and less expensive than the sources working separately on individual solutions. Partners in Yahara WINS include cities, villages, towns, wastewater treatment plants, agricultural producers, environmental groups and others.

Yahara WINS approached the Land Conservation Department in 2016 to discuss the merits of developing a partnership to apply best management practices in the Yahara River watershed. Once the service agreement is signed by both parties and the Land Conservation Department’s budget is amended, the Land Conservation Department staff will work with agricultural producers in the Yahara River and Badfish Creek watersheds to establish a series of Best Management Practices on the landscape to reduce phosphorus discharges to these waterbodies. Yahara WINS will reimburse the County for costs associated with the aforementioned work, on a dollar for dollar basis.

- EXECUTIVE SUMMARY –

ACCEPTANCE OF RECREATIONAL TRAIL GRANT FUNDS FROM THE WISCONSIN
DEPARTMENT OF NATURAL RESOURCES FOR BELOIT TO JANESVILLE
CONNECTOR TRAIL IMPROVEMENTS AND AMENDING THE PARKS BUDGET

We have finalized the easements for the Beloit to Janesville Trail. One of the focuses of the
POROS plan is making the trail system sustainable, including development and maintenance.

In order to move forward on this project, the Parks Division applied for Department of Natural
Resources Recreational Trails Stewardship Funds. This grant program prioritizes projects that
develop new partnership trails. The project will establish a gravel bike trail from Bass Creek Road
to Big Hill Park on Duggan Road and Walters Road.

The grant being awarded requires at least 50/50 match of local funds. The anticipated project is
$100,000 of which $45,000 will be Rec Trail Grant Funds. The local match is included in the 2017
Park’s capital budget in the amount of $50,000 with combined funds and volunteer efforts from
the Rock Trail Coalition of $5,000.

A hired contractor specializing in sustainable trail design will complete trail reconstruction and
maintenance work. Competitive bids will be solicited during 2017. The work will be completed
during 2017 if possible. Trail volunteers will be rallied to assist parks staff and/or the contractor
with clearing and construction of trail sections.

The grant requires a 50/50 match of local funds. The local match is included in the 2017 Park’s
capital budget, however the grant funds were not included during the budget process as they were
awarded in February 2017, thus requiring a budget amendment.

EXECUTIVE SUMMARY
AUTHORIZING EASEMENT TO
IDEAL MIDWEST, LLC TO CROSS PELISHEK TIFFANY NATURE TRAIL

Rock County has owned the 64.3 acres of the Pelishek Tiffany Nature Trail since September 26, 1995, and is working on continued development of this park property via a long-term partnership agreement with the PTNT Foundation. Currently, the trail is open for winter snowmobile use and is open for hiking, bird watching, bicycle use and equestrian use in the summer.

Ideal Midwest, LLC, Clinton, has requested an easement to bore under the trail as part of a sanitary sewer and water lateral project. A sanitary sewer and water lateral pipes will be installed in this bored hole to carry sanitary sewer and water lateral pipes from one side of the trail to the other and distribute it to the desired client. They propose to cross the trail south of Front Street in Clinton, WI. This preferred approach will cause the least amount of disruption and damage to the trail.

Because this project will have a potentially long-term effect on the trail, it needs to be approved by the appropriate committees and the Rock County Board of Supervisors. A fee of $500 has been stipulated in accordance with past easements of this nature.

- Executive Summary -

The Department of Public Works (DPW) Shop Foreman has formally notified the department head of his intended retirement on July 14, 2017. His last day working at the DPW Shop is scheduled for June 2, 2017. He intends to use his vacation balance between June 2, 2017 and July 14, 2017.

This position requires the ability to coordinate and regularly adapt to the fleet needs of the Department, maintain detailed records, supervise mechanic staff and understand and adapt to various types of equipment needs.

Because of these unique job requirements, it is advantageous to bring in the successor employee before the incumbent leaves for the detailed training required to fulfill the duties of the position. The department head has met with the administrator and human resources staff to plan a strategy and map a plan of recruitment for the position.

It was determined that an overlap of the two positions of at least ten weeks for an external candidate or eight weeks for an internal candidate may be needed to successfully accomplish the transition. Due to the retiring Shop Foreman utilizing his remaining vacation, the ten week position overlap for an external candidate would allow four weeks of working overlap. Eight weeks of overlap for an internal candidate would allow two weeks of working overlap.

This resolution authorizes up to ten weeks of double fill of the position for orientation and training. In review of current status of the shop portion of the DPW budget, there are available funds for the overlap. No additional funds are being requested at this time.
