Authorizing Purchase of VMWare Enterprise Software

The Information Technology department currently supports a virtual environment using Citrix XenServer, a freeware based application which provides no end user license agreement and no long term support investment. One strategic course the IT Department intends to follow is one of standardization and consolidation. VMWare software is an industry leading application that affords the IT Department a means by which less hardware will need to be purchased and multiple operating systems can reside all within the same machine. This strategy leads to economies of scale and efficiency since less machines will need to be purchased and managed. Additionally, VMWare will be supported by trained engineers that will be able to assist the IT department as needed both in applications and software monitoring.

The purchase of the VMWare vSphere software, a 3 year support contract, and the associated implementation services will be procured from CDW-G via the State of Wisconsin contract # 505ENT-M16-VARSOFTWARE-04 in the amount of \$61,395.01.
