**Accepting Additional Public Health Prevention Grant Funds and
Amending the 2019 Rock County Public Health Department Budget**

Executive Summary

The Preventive Health and Health Services (PHHS) Block Grant is a federal program which allocates funds to states to improve the health of the general population. One objective is to ensure a competent workforce through the assessment of staff competencies, the provision of individual training and professional development, along with the provision of a supportive work environment.

Through the 2017 Employee Engagement Survey, Rock County Public Health Department staff members identified "Professional Development" and "Career Advancement" as two key areas for improved engagement. The agency does not currently have a Workforce Development Plan, therefore the funding will be used to supplement efforts to improve workforce competencies and maintain a competent public health workforce through the preparation and implementation of a Workforce Development Plan. This will include identification of training opportunities around Healthy Wisconsin priorities for appropriate staff. This amendment reflects \$980 additional PHHS funding.
