

## Notes:

- **Do not mix used vehicle fluids or chemicals!** Keep them separate for easier recycling year-round. Mixed materials become hazardous waste, which is difficult to dispose of safely or conveniently.
- **Avoid stockpiling items - recycle often.** Stockpiles are a hazard to health and safety because of increased risk of toxic leaks, vapors, or fire. It is also harder and more expensive to recycle lots of material at once. Piles of waste take up valuable space.
