Executive Summary

Awarding Contracts for Exterior Electrical and Siding Upgrades
On The Department of Public Works Garage Exterior Walls

On May 7, 2017, Rock County Public Works removed a dirt berm when resurfacing the parking lot. Removal of the berm allows for trucks to be able to park alongside the building for better utilization of space. Additionally, it will improve access to the trucks and the drivers will be able to use the building as a wind block to help with starting the trucks in the winter.

Now that the berm has been removed, the exposed walls will need to be insulated and new siding installed. Additionally, electrical receptacles will also be added to plug in the block heaters on the trucks.

Bids were solicited for both projects at the same time allowing contractors to bid on one or both projects. The most advantageous outcome for Rock County is to award each project separately to the lowest most responsive and responsible bidder for each project as follows:

- Gilbank Construction of Clinton Wisconsin, in the amount of $63,900 plus a $3,000 contingency for the installation of insulation and sheet metal.

- Pieper Power of Janesville Wisconsin, in the amount of $50,000 plus a $2,500 contingency for the installation of receptacles every 20 foot.
