## Executive Summary

### **ACCEPTING DOJ EBDM PRETRIAL PILOT SITES PROJECT GRANT AND AMENDING THE 2019 BUDGET**

Rock County has been working with the State of Wisconsin and the National Institute of Corrections as an Evidence-Based Decision Making (EBDM) Initiative local site since 2015. Through a deliberative, collaborative process, using data and research to help guide decision-making, the County decided to enhance various areas of its criminal justice system. Through this process the County decided to establish a pretrial and assessment service program for individuals going through the criminal justice system.

The decision to release or detain a defendant during the pretrial phase of a criminal case has both short- and long-term consequences for defendants, the justice system, and the general public. Pretrial seeks to achieve three underlying goals: (1) maximize the release of pretrial defendants (recognizing the presumption of innocence and the harmful effects of pretrial detention); (2) maximize public safety; and (3) maximize court appearance. According to the research, making pretrial release and detention decisions without actuarial assessment guidance can have harmful effects on both defendants and the general public. Releasing extremely high risk defendants without assessment or matched supervision can be a threat to public safety. At the same time, recent research has also demonstrated that detaining low and moderate risk defendants in jail for even short periods of time (i.e., 2–3 days) can increase their risk for misconduct both short- and long-term. Pretrial risk assessment results will be used to guide release decisions and level of supervision necessary to ensure offender does not recidivate and attends all court appearances during the pendency of the case. A monitoring system to ensure compliance with release conditions will also be established.

Rock County, along with six other EBDM Pretrial Sites and the State of Wisconsin Department of Justice have been working to develop and implement pretrial programs in the pilot sites. These programs are designed to maximize public safety and court appearance while maximizing pretrial release. The pilot programs will utilize data and research to develop a model that can be tested and evaluated to determine the effectiveness, to potentially lead to replication in other counties. To this end, the WI DOJ established a grant opportunity to assist these sites with the aforementioned goals. Monies received under this grant will fund a pretrial case manager, which is contracted through JusticePoint (as the result of a competitive RFQ process), tools for pretrial supervision (GPS monitoring, SCRAM monitoring, Remote Breath monitoring, and Drug testing), and for the County's Justice System Manager, who oversees the pretrial pilot program in Rock County, to attend the National Association of Pretrial Services Agencies annual conference.
