EXECUTIVE SUMMARY

The Rock County Communications Center depends heavily on the ability to quickly and accurately locate callers requiring a public safety response. Landline 911 provides very accurate and specific caller location information to 911 call takers, whereas Wireless 911 only provides the call taker with the Global Positioning System (GPS) coordinates of the wireless device. These coordinates are populated onto the CAD (Computer-Aided Dispatch) mapping system which gives the call taker a one dimensional view of the nearest address point or intersection of the device.

Since 2005 the Communications Center has utilized Pictometry International Corporation's digital imagery interface to further assist in locating wireless 911 callers within Rock County. Pictometry provides a multi-view, high-resolution oblique and orthogonal images of Rock County taken from several different fly-over directions. The 911 call-takers and dispatchers utilize these images along with the 911 mapping to locate wireless callers and to direct public safety responders to emergency scenes.

In an effort to regularly update these images and have accurate information for the Communications Center staff and public safety responders a new fly-over is necessary. The last update to these images was completed in 2015. Since then there have been many new constructions to structures, subdivisions, and roadways. While extremely important to public safety responses, these images are also shared with various government agencies within Rock County at no additional charge (to include all historical images dating back to 2005).

The total cost of the fly-over and software over a two-year period is \$128,943.00. The 2019 payment is \$64,471.50 and has been approved in the Communications Center's 2019 budget. The remaining half will be budgeted and paid for in 2020.

Executive Summary

AWARDING CONTRACT FOR PRETRIAL AND CRIMINOGENIC RISK ASSESSMENT AND SUPERVISION SERVICES

Beginning December 2017, Rock County sought proposals from qualified individuals/firms to operate pretrial and assessment services. Rock County has been working with the State of Wisconsin and the National Institute of Corrections as an Evidence-Based Decision Making (EBDM) Initiative local site. Through a deliberative, collaborative process, using data and research to help guide decision-making, the County decided to enhance various areas of its criminal justice system. Through this process the County decided to establish a pretrial and assessment service program to individuals going through the criminal justice system. The Request for Qualifications asked for a proposal addressing providing pretrial and other criminogenic assessment services, as well as pretrial supervision services. A panel of seven justice system stakeholders evaluated proposals from four vendors and determined Justice Point to be the most qualified proposer. The EBDM Ad Hoc Committee supports the recommendation to contract with Justice Point for these services.

The decision to release or detain a defendant during the pretrial phase of a criminal case has both short- and long-term consequences for defendants, the justice system, and the general public. Pretrial seeks to achieve three underlying goals: (1) maximize the release of pretrial defendants (recognizing the presumption of innocence and the harmful effects of pretrial detention); (2) maximize public safety; and (3) maximize court appearance. According to the research, making pretrial release and detention decisions without actuarial assessment guidance can have harmful effects on both defendants and the general public. Releasing extremely high risk defendants without assessment or matched supervision can be a threat to public safety. At the same time, recent research has also demonstrated that detaining low and moderate risk defendants in jail for even short periods of time (i.e., 2-3 days) can increase their risk for misconduct both short- and long-term. Pretrial risk assessment results will be used to guide release decisions and level of supervision necessary to ensure offender does not recidivate and attends all court appearances during the pendency of the case. A monitoring system to ensure compliance with release conditions will also be established.

Long-term criminogenic risk screens and assessments will also be conducted. Research shows recidivism is more likely reduced when the justice system focuses on criminogenic needs, uses a cognitive behavioral approach, reserves more intensive services for higher risk offenders, and uses aftercare services. In order to use effective/appropriate risk-reduction interventions, risk and needs will be determined through validated risk screening and assessment tools. They will be used to determine preliminary eligibility for the County's various alternative justice programs (i.e., Diversion, Enhanced Deferred Prosecution, Drug Court, OWI Court, and Veterans Court) and to assist justice system stakeholders as individuals go through the justice system.

The contract will start with a data collection and evaluation period, during which it will be determined proper staffing levels and resources to fully implement these services in Rock County. As a part of the 2019 budget, the County Board of Supervisors approved funding for EBDM projects.

Executive Summary

RE-AUTHORIZING EVIDENCE-BASED DECISION MAKING (EBDM) COMMITTEE

In June 2008, the National Institute of Corrections (NIC) partnered with the Center for Effective Public Policy to build a system-wide framework (arrest through final disposition and discharge) resulting in more collaborative, evidenced-based decision making and practices in local criminal justice systems. In February 2015, Rock County was selected to participate in the EBDM Initiative and in March 2015, the County Board created the Evidence- Based Decision Making Initiative Ad Hoc Committee to oversee the activities under this Initiative. By Resolution, upon cessation of technical assistance provided by NIC under the Initiative, the Ad Hoc Committee would be dissolved and in 2018, Rock County stopped receiving official technical assistance for EBDM from NIC. Despite this, Rock County continues to work with the State of Wisconsin and other Wisconsin county EBDM site in implementing the change targets identified through the EBDM process to improve the County's criminal justice system. The identified change targets are: Behavioral Health Information Sharing, Diversion Program, Enhanced Deferred Prosecution Program, Stakeholder Engagement and Education, Risk Assessment and Pretrial. In the 2019 Budget, the Rock County Board of Supervisors approve funding in the amount of \$481,000 to implement these initiatives.

NIC identified various stakeholders to act as the EBDM Policy Team and it is recommended representatives from these areas continue to oversee the implementation of the EBDM change targets. The following have been identified as key decision makers and stakeholder groups:

- Law Enforcement Officials
- Pretrial Officials
- Victim Advocates,
- Prosecutors
- Defense Attorneys
- Jail Administrators
- Court Administrators
- Judges
- Community Corrections
- City/County Managers/Commissioners
- Community Representatives
- Behavioral Health and Human Service Representatives

If approved, additional action will be required by the County Board to appoint or re-appoint individuals to the EBDM Committee.
